DETAILED ACTION

1. Claims 10-20, 25-27, 30-32, and 35-37 are pending.
2. Amendment filed 05/22/2006 has been received and considered.

Claim Objections

3. Claims 10, 15, 20, 30-32, and 35-37 are objected to because of the following informalities: in each of Applicant's newly added sections to the independent claims the phrase "the product kdi " appears, however, according to the specification page 16 it should read "the product kd_i ". Appropriate correction is required. The specification on page 11 states that, "From hereon assume that every exponentiation is performed mod N ", Applicant's are encouraged to reflect this in the claims for clarity.

Claim Rejections - 35 USC § 112

4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

5. Claims 20, 25-27, 32, and 37 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to

Art Unit: 2137

particularly point out and distinctly claim the subject matter which applicant regards as the invention.

6. Claims 20, 32, and 37 recite the limitation "the product of modulus M of d and the d_i values" in lines 10, 11, and 12 respectively. There is insufficient antecedent basis for this limitation in the claim because none of these values have been previously defined in the claim.

7. Any claims not specifically addressed are rejected by virtue of their dependencies.

Allowable Subject Matter

8. Claims 10-19, 30, 31, 35, and 36 are allowable if rewritten to fix the claim objections given above.

9. Claims 20, 25-27, 32, and 37 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.

10. The following is a statement of reasons for the indication of allowable subject matter: the prior art teaches storing keys in a database, but does not teach the value, c , that is a product of modulus M of d and the d_i values for I indices that correspond to the particular secret owners present in the unique combination for that particular entry, wherein c corresponds to

Art Unit: 2137

modulus M of the product kd_i , where the value c is used to determine the encrypted secret.

Conclusion

11. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
